

www.HomeWaterSafety.com wants you to know that . . .

. . . Flooding is the #1 Most Common Environmental Disaster in the United States.

While tornadoes, hurricanes, earthquakes, and wildfires grab all of the media attention, flooding actually does more damage in more parts of the United States than any other natural disaster. The annual cost of repairing flood damage is in the billions. Clean up is hazardous, time consuming, and expensive. To top it off, many insurance agencies are making it harder to purchase adequate flood coverage to reimburse all of your losses.

Keep your property and valuables safe by stopping the water from ever getting to them in the first place!

Think It Won't Happen to You?

No matter what part of the country you live in, the potential for flooding is always there. You don't have to live on the banks of the Mississippi to suffer from flooding caused by spring thaw and runoff, broken water mains, torrential downpours, and faulty plumbing. Those dangers are ever-present—even if you live in a big city!

StormTec Stormbags Are a Low-Cost, Effective, and Efficient Way to Protect Your Valuables!

What are they? StormTec Stormbags are an incredible new product—a sand bag that doesn't need any sand! Stormbags are lightweight, burlap and cotton sacks filled with a revolutionary polymer that can absorb many times its own weight in water. That means you won't ever have to fill a sandbag again. All you need to use these bags are the bags themselves and water!

StormTec Stormbags:

- Can absorb up to 5 gallons of water.
- Take less than 4 minutes to reach their full capacity.
- Contain a non-toxic, non-hazardous polymer that absorbs huge amounts of water and is completely biodegradable.
- Weigh only 14 oz when dry (that's less than a pound apiece) and can be stored pretty much anywhere.
- Cost only \$7 apiece (discounts are available for bulk orders—see website for details.)
- Can save you hours of back-breaking labor associated with filling sandbags.
- Dramatically increase your response time and allow one person to do the work of many.

See For Yourself

I wouldn't expect you to take my word for it. On my website you'll see actual **Videos of StormTec Stormbags** doing their thing. See with your own eyes how quickly they swell from less than a pound to 33 pounds and do everything from diverting water around a doorway to completely damming up a running stream—and all you have to do is lay them down and get them wet!

Stormbag

And they're not just great when the weather is bad.

Use **StormTec Stormbags** to:

- **Protect your worksite from runoff.**
- **Protect property from (and prevent) landslides.**
- **Divert flowing water around and stop it from seeping into doorways, foundations, and basements.**
- **Soak up spills quickly, neatly, and without any real labor at all.**
- **Anything you might use traditional sandbags for and much, much more!**

Act Now and Be Prepared!

There's no point in waiting for flooding to occur before getting ready to combat it. Having the necessary materials on hand and accessible anytime is the key to reducing your reaction time and may just save you thousands of dollars in costly repairs.

Please visit my website at www.HomeWaterSafety.com to learn how these revolutionary **StormTec Stormbags** can keep your property dry and protect you from flood related damage.

Thank you for your time,
